(x) Specify "S" for surface mounting or "F" for flush

Application:
Type 1 traditionally called "telephone cabinets", TCS and TCF enclosures are not limited to housing telephone equipment. They are often used in hospitals, schools and hotels to centralize switches and dimmers for instance, the plywood mounting panel eliminating electrical noise these devices tend to generate. They can also be used to hide a bulky piece of control equipment or simply as top of the line junction boxes, when esthetics come into play.

Construction:
- 16 or14 gauge steel, depending on enclosure size
- 14 gauge steel door(s)
- Single door on 24" wide and under enclosures models; double doors on greater than 24" wide models
- 3/4" lip all around on flush cover
- 1/4 turn lock provided with two (2) keys
- ANSI/ASA61 grey polyester textured powder coating inside out

Also Available:
- Grounding kit
- Cutouts, louvers and hubs
- Aluminium, SS, galvanized steel
- Special finishes & sizes
- TYPE 3R, 4X or 12

How To Order:
- Specify TCS for surface mounting
- Specify TCF for flush mounting
- Specify KO for Knockouts (1/2" - 3/4")
- Specify WB for wood back (TCFKO24246WB =24"x24"x6" Flush mounting cabinet complete with knockouts & wood back)
